

NATURES OWN LUBRICATION & CORROSION PROTECTION

USER GUIDE

LEATHER PRESERVATION

BENEFITS:

- Non-toxic lanolin film
- Soaks in and prolongs life of leather
- Penetrates surface and prolongs leather life
- Does not evaporate or leach
- No breakdown with exposure to U. V. Rays
- No affect on stitching, saddles, tack etc.
- Rejuvenates old dried out leather to make it pliable and soft again restoring to near original condition
- The anti-corrosive qualities in our product will protect D's and buckles on saddles, screws and all metal fittings from rust and corrosion
- Non-slip when wet
- Easy to apply

APPLICATION: Apply *Woolube Ozspray Industry Grade* to provide an even coating over the surface by spraying directly onto the surface, brushing on or use a lamb's wool applicator. Leather that is dried out will require extra attention to rejuvenate.

As this is a penetrating liquid not a surface finish, any excess will remain tacky and will require removal. This is easily accomplished with a terry toweling or cotton cloth and requires light rubbing, which works the lanolin into the leather surface and seals the surface.

Should additional applications be required in the future, simply reapply – no special preparation is necessary.
